Dr. Joshua Lederberg,
Department of Genetics,
University of Wisconsin,
Madison, Wisconsin

Dear Joshua:

Glucose oxidase is supplied by Vitazyme Laboratories, West Washington Road, Chicago, under the name of Deoxygenase. This is a fungal preparation and is supplied as a solution containing 2-20% glucose as a stabilizer. Costs about \$3 per lb. I understand that you can get a preparation with a relatively low glucose content by asking for same. Also a dry preparation more suitable for glucose estimation may be available on request.

Crude notatin is also sold by Messrs. Boots, "Pure Drugs", Nottingham, England.

With best regards,

H. A. Barker.

H. A. Barker
